JOURNAL OF MOLECULAR CATALYSIS

Author Index

Acosta, D., see Bosch, P. 67
Aguilar-Ríos, G., see Bosch, P. 67
Archer, R.D., see Watanabe, T. 253
Barrault, J., Blanchard, M., Derouault, A., Ksibi, M. and Zaki, M.I.
Infrared observation of the chemical consequences of cobalt catalyst produced in mixed solutions of $Al(Et)_3$ and $Co(acac)_2$ 289
Beaudry, W.T., Wagner, G.W. and Ward, J.R.
Cu^{II}–diamine complex catalyzed hydrolysis of phosphate triesters adsorbed on strong-base ion exchange resins. ^{31}P NMR relaxation measurements 221
Bello, J.F., see Martin, J.C. 37
Bello, J.F., see Roig, M.G. 85
Bello, J.F., see Roig, M.G. 105
Bhatia, R.K. and Rao, G.N.
Catalytic activity of anchored vanadyl complexes 29
Bhattacharya, A.K.
High resolution Auger electron spectroscopic study of the chemisorption and decomposition of benzene, cyclohexene and cyclohexane on a clean and carbided Fe(110) surface 181
Bigini, L., see Botteghi, C. 279
Blanchard, M., see Barrault, J. 289
Bosch, P., Valenzuela, M.A., Zapata, B., Acosta, D., Aguilar-Ríos, G., Maldonado, C. and Schifter, I.
High temperature treated $Pt/Sn–ZnAl_2O_4$ catalysts 67
Botteghi, C., Ponte, G.D., Marchetti, M. and Paganelli, S.
Recent contributions of carbonylation reaction to the synthesis of fluorinated pharmaceutical compounds 1
Botteghi, C., Paganelli, S., Bigini, L. and Marchetti, M.
Hydroformylation of 1-aryl-1-(2-pyridyl)ethenes catalyzed by rhodium complexes 279
Brunet, B., see Maltha, A. 305
Burguillo, F.J., see Martin, J.C. 37
Cachaza, J.M., see Roig, M.G. 85
Cachaza, J.M., see Roig, M.G. 105
Caubère, P., see Gallezot, P. 79
Chen, D.T., Zhang, L., Kobe, J.M., Yi, C. and Dumesic, J.A.
Methylamine synthesis over solid acid catalysts: reaction kinetic measurements 337
Darensbourg, D.J., see Ovalles, C. 125
Dawidowicz, A., see Rogalski, J. 233
Derouault, A., see Barrault, J. 289
Divakar, S., see Ravichandran, R. L247
Dumesic, J.A., see Chen, D.T. 337
Fernández, C., see Ovalles, C. 125
Fort, Y., see Gallezot, P. 79
Fujishita, Y., see Ohkubo, K. 189
Gallezot, P., Leclercq, C., Fort, Y. and Caubère, P.
Subnanometer nickel clusters in complex reducing agents 79
Gubelmann, M., see Neves, I. 169
Guisnet, M., see Neves, I. 169
Haikawa, S., see Harada, T. 211
Harada, T., Kawamura, T., Haikawa, S. and Osawa, T.
Enantioface-differentiating hydrogenation of the C=O double bond using a modified Raney nickel: role of the carboxylic acid added to the reaction system 211
Hayashi, H., see Sugiyama, S. 53
Hendriks, H.E.J., Kuster, B.F.M. and Marin, G.B.
Global kinetics of the alkaline oxidative degradations of lactose 317
Hirota, S., see Ohkubo, K. 189
Honda, Y., see Ohkubo, K. 189
Jang, H.J., see Sohn, J.R. 149
Jayat, F., see Neves, I. 169
Kawamura, T., see Harada, T. 211
Kennedy, J.F., see Roig, M.G. 85
Kennedy, J.F., see Roig, M.G. 105
Kobe, J.M., see Chen, D.T. 337
Kondo, N., see Sugiyama, S. 53
Ksibi, M., see Barrault, J. 289
Kuster, B.F.M., see Hendriks, H.E.J. 317
Leclercq, C., see Gallezot, P. 79
Leonowicz, A., see Rogalski, J. 233
Magnoux, P., see Neves, I. 169
Maldonado, C., see Bosch, P. 67

Maltha, A., Van Wermeskerken, S.C., Brunet, B. and Ponec, V.
Transition metal oxides as catalysts for the selective reduction of nitrobenzene 305
Marchetti, M., see Botteghi, C. 1
Marchetti, M., see Botteghi, C. 279
Marin, G.B., see Hendriks, H.E.J. 317
Martin, J.C., Bello, J.F., Burguillo, F.J. and Roig, M.G.
Kinetic behaviour and reaction mechanism of the hydrolysis of *p*-nitrophenyl palmitate in mixed micelles with Triton X-100 catalyzed by lipase from *Candida rugosa* 37
Masai, M., see Nakamura, K. 195
Moffat, J.B., see Sugiyama, S. 53
Moreno, J.M. and Sinisterra, J.V.
Immobilization of lipase from *Candida cylindracea* on inorganic supports 357
Nageswara Rao, N.
Photocatalytic reduction of coordinated dinitrogen to ammonia – mononuclear versus dinuclear ethylenediaminetetraacetato ruthenium complexes 23
Nakamura, K., Nishiyama, S., Tsuruya, S. and Masai, M.
Oxidation of catechol with $KMnO_4$ by using crown ethers as phase transfer catalysts 195
Neves, I., Jayat, F., Magnoux, P., Pérot, G., Ribeiro, F.R., Gubelmann, M. and Guisnet, M.
Acylation of phenol with acetic acid over a HZSM5 zeolite, reaction scheme 169
Nishiyama, S., see Nakamura, K. 195
Ogura, K., see Uchida, H. 269
Ohkubo, K., Urata, Y., Hirota, S., Honda, Y., Fujishita, Y. and Sagawa, T.
Homogeneous esterolytic catalysis of a polymer prepared by molecular imprinting of a transition state analogue 189
Okura, I., see Sugimori, D. 119
Osawa, T., see Harada, T. 211
Ovalles, C., Fernández, C. and Darensbourg, D.J.
Homogeneous catalytic synthesis of formaldehyde using the tungsten carbonyl complex $[(CO)_5WCl]^-$ in the presence of sodium methoxide 125
Paganelli, S., see Botteghi, C. 1
Paganelli, S., see Botteghi, C. 279
Park, E.H., see Sohn, J.R. 149
Park, M.Y., see Sohn, J.R. 149
Park, S.E., see Sohn, J.R. 149
Pérot, G., see Neves, I. 169
Ponec, V., see Maltha, A. 305
Ponte, G.D., see Botteghi, C. 1
Rao, G.N., see Bhatia, R.K. 29
Ravichandran, R. and Divakar, S.
Stereoselective reduction of menthone with sodium dithionite in the presence of β-cyclodextrin L247
Ribeiro, F.R., see Neves, I. 169
Rodriguez, S., see Roig, M.G. 85
Rodriguez, S., see Roig, M.G. 105
Rogalski, J., Dawidowicz, A. and Leonowicz, A.
Lactose hydrolysis in milk by immobilized β-galactosidase 233
Roig, M.G., see Martin, J.C. 37
Roig, M.G., Bello, J.F., Rodriguez, S., Cachaza, J.M. and Kennedy, J.F.
Human placental alkaline phosphatase covalently immobilized on a cross-flow microfiltration polyvinylidene difluoride membrane. Part I. Physicochemical effectors 85
Roig, M.G., Bello, J.F., Rodriguez, S., Cachaza, J.M. and Kennedy, J.F.
Human placental alkaline phosphatase covalently immobilised on a cross-flow microfiltration polyvinylidene difluoride membrane Part II. Activity vs. [substrate] kinetic behaviour 105
Sagawa, T., see Ohkubo, K. 189
Sasaki, T., see Uchida, H. 269
Satomi, K., see Sugiyama, S. 53
Schifter, I., see Bosch, P. 67
Shigemoto, N., see Sugiyama, S. 53
Sinisterra, J.V., see Moreno, J.M. 357
Sohn, J.R., Jang, H.J., Park, M.Y., Park, E.H. and Park, S.E.
Physicochemical properties of TiO_2–SiO_2 unmodified and modified with H_2SO_4 and activity for acid catalysis 149
Sugimori, D. and Okura, I.
Comparison of reactivity of alkene epoxidation with intact cells and cell-free extracts of *Methylosinus trichosporium* OB3b 119
Sugiyama, S., Satomi, K., Kondo, N., Shigemoto, N., Hayashi, H. and Moffat, J.B.
Role of surface chlorine species in the oxidative coupling of methane in the presence of tetrachloromethane on magnesium phosphate and sulphate 53
Szymańska-Buzar, T.
Polymerization of phenylacetylene by Lewis acid activated tungsten carbonyl complexes 137
Tsuruya, S., see Nakamura, K. 195
Uchida, H., Sasaki, T. and Ogura, K.
Dark catalytic reduction of CO_2 over Prussian blue-deposited TiO_2 and the photo-reactivation of the catalyst 269
Urata, Y., see Ohkubo, K. 189
Valenzuela, M.A., see Bosch, P. 67
Van Wermeskerken, S.C., see Maltha, A. 305
Wagner, G.W., see Beaudry, W.T. 221
Ward, J.R., see Beaudry, W.T. 221

Watanabe, T. and Archer, R.D.
Catalytic oxidation of erythrosine by cobalt phthalocyanines 253
Yi, C., see Chen, D.T. 337
Zaki, M.I., see Barrault, J. 289
Zapata, B., see Bosch, P. 67
Zhang, L., see Chen, D.T. 337

JOURNAL OF MOLECULAR CATALYSIS

Subject Index

β-Cyclodextrin
Stereoselective reduction of menthone with sodium dithionite in the presence of β-cyclodextrin L247
Acetic acid
Acylation of phenol with acetic acid over a HZSM5 zeolite, reaction scheme 169
Acetylacetonate complexes
Infrared observation of the chemical consequences of cobalt catalyst produced in mixed solutions of $Al(Et)_3$ and $Co(acac)_2$ 289
Acid catalysts
Physicochemical properties of TiO_2–SiO_2 unmodified and modified with H_2SO_4 and activity for acid catalysis 149
Methylamine synthesis over solid acid catalysts: reaction kinetic measurements 337
Activation energy
Catalytic oxidation of erythrosine by cobalt phthalocyanines 253
Activity optimization
Lactose hydrolysis in milk by immobilized β-galactosidase 233
Acylation
Acylation of phenol with acetic acid over a HZSM5 zeolite, reaction scheme 169
Affinity membrane
Human placental alkaline phosphatase covalently immobilized on a cross-flow microfiltration polyvinylidene difluoride membrane. Part I. Physicochemical effectors 85
Human placental alkaline phosphatase covalently immobilised on a cross-flow microfiltration polyvinylidene difluoride membrane Part II. Activity vs. [substrate] kinetic behaviour 105
Alkaline oxidation
Global kinetics of the alkaline oxidative degradations of lactose 317
Alkaline phosphatase
Human placental alkaline phosphatase covalently immobilized on a cross-flow microfiltration polyvinylidene difluoride membrane. Part I. Physicochemical effectors 85
Human placental alkaline phosphatase covalently immobilised on a cross-flow microfiltration polyvinylidene difluoride membrane Part II. Activity vs. [substrate] kinetic behaviour 105
Alkanones
Enantioface-differentiating hydrogenation of the C=O double bond using a modified Raney nickel: role of the carboxylic acid added to the reaction system 211
Alkenes
Comparison of reactivity of alkene epoxidation with intact cells and cell-free extracts of *Methylosinus trichosporium* OB3b 119
Alumina
Methylamine synthesis over solid acid catalysts: reaction kinetic measurements 337
Aluminate
High temperature treated Pt/Sn–$ZnAl_2O_4$ catalysts 67
Amine complexes
Cu^{II}–diamine complex catalyzed hydrolysis of phosphate triesters adsorbed on strong-base ion exchange resins. ^{31}P NMR relaxation measurements 221
Auger line shape analysis
High resolution Auger electron spectroscopic study of the chemisorption and decomposition of benzene, cyclohexene and cyclohexane on a clean and carbided Fe(110) surface 181
Bond strength
Transition metal oxides as catalysts for the selective reduction of nitrobenzene 305
Candida rugosa lipase
Kinetic behaviour and reaction mechanism of the hydrolysis of *p*-nitrophenyl palmitate in mixed micelles with Triton X-100 catalyzed by lipase from *Candida rugosa* 37
Carbided surface
High resolution Auger electron spectroscopic study of the chemisorption and decomposition of benzene, cyclohexene and cyclohexane on a clean and carbided Fe(110) surface 181
Carbon dioxide
Dark catalytic reduction of CO_2 over Prussian

blue-deposited TiO_2 and the photo-reactivation of the catalyst 269
Carbonylation
Recent contributions of carbonylation reaction to the synthesis of fluorinated pharmaceutical compounds 1
Carbonyl complexes
Homogeneous catalytic synthesis of formaldehyde using the tungsten carbonyl complex $[(CO)_5WCl]^-$ in the presence of sodium methoxide 125
Catechol
Oxidation of catechol with $KMnO_4$ by using crown ethers as phase transfer catalysts 195
Chemisorption
High resolution Auger electron spectroscopic study of the chemisorption and decomposition of benzene, cyclohexene and cyclohexane on a clean and carbided Fe(110) surface 181
Chloride
Role of surface chlorine species in the oxidative coupling of methane in the presence of tetrachloromethane on magnesium phosphate and sulphate 53
Clusters
Subnanometer nickel clusters in complex reducing agents 79
Cobalt
Infrared observation of the chemical consequences of cobalt catalyst produced in mixed solutions of $Al(Et)_3$ and $Co(acac)_2$ 289
Complex reducing agents
Subnanometer nickel clusters in complex reducing agents 79
Copper
Cu^{II}–diamine complex catalyzed hydrolysis of phosphate triesters adsorbed on strong-base ion exchange resins. ^{31}P NMR relaxation measurements 221
Cross-linking
Lactose hydrolysis in milk by immobilized β-galactosidase 233
Crown ether
Oxidation of catechol with $KMnO_4$ by using crown ethers as phase transfer catalysts 195
Cyclic hydrocarbons
High resolution Auger electron spectroscopic study of the chemisorption and decomposition of benzene, cyclohexene and cyclohexane on a clean and carbided Fe(110) surface 181
Dehydrogenation
High temperature treated $Pt/Sn–ZnAl_2O_4$ catalysts 67
Dinuclear complexes
Photocatalytic reduction of coordinated dinitrogen to ammonia – mononuclear versus dinuclear ethylenediaminetetraacetato ruthenium complexes 23
Effectors
Human placental alkaline phosphatase covalently immobilized on a cross-flow microfiltration polyvinylidene difluoride membrane. Part I. Physicochemical effectors 85
Electron transfer
Catalytic oxidation of erythrosine by cobalt phthalocyanines 253
Enantio-differentiating hydrogenation
Enantioface-differentiating hydrogenation of the C=O double bond using a modified Raney nickel: role of the carboxylic acid added to the reaction system 211
Enzyme kinetics
Kinetic behaviour and reaction mechanism of the hydrolysis of *p*-nitrophenyl palmitate in mixed micelles with Triton X-100 catalyzed by lipase from *Candida rugosa* 37
Epoxidation
Comparison of reactivity of alkene epoxidation with intact cells and cell-free extracts of *Methylosinus trichosporium* OB3b 119
Erythrosine
Catalytic oxidation of erythrosine by cobalt phthalocyanines 253
Fe(110)
High resolution Auger electron spectroscopic study of the chemisorption and decomposition of benzene, cyclohexene and cyclohexane on a clean and carbided Fe(110) surface 181
Fluorination
Recent contributions of carbonylation reaction to the synthesis of fluorinated pharmaceutical compounds 1
Formaldehyde
Homogeneous catalytic synthesis of formaldehyde using the tungsten carbonyl complex $[(CO)_5WCl]^-$ in the presence of sodium methoxide 125
FT-IR spectroscopy
Infrared observation of the chemical consequences of cobalt catalyst produced in mixed solutions of $Al(Et)_3$ and $Co(acac)_2$ 289
β-Galactosidase
Lactose hydrolysis in milk by immobilized β-galactosidase 233
High temperature treatment
High temperature treated $Pt/Sn–ZnAl_2O_4$ catalysts 67
Human phosphatase
Human placental alkaline phosphatase covalently immobilized on a cross-flow microfiltration polyvinylidene difluoride membrane. Part I. Physicochemical effectors 85

Human placental alkaline phosphatase covalently immobilised on a cross-flow microfiltration polyvinylidene difluoride membrane Part II. Activity vs. [substrate] kinetic behaviour 105
Hydroformylation
Hydroformylation of 1-aryl-1-(2-pyridyl)ethenes catalyzed by rhodium complexes 279
Hydrogenation
Enantioface-differentiating hydrogenation of the C=O double bond using a modified Raney nickel: role of the carboxylic acid added to the reaction system 211
Hydrogen peroxide
Catalytic oxidation of erythrosine by cobalt phthalocyanines 253
Hydrolysis
Homogeneous esterolytic catalysis of a polymer prepared by molecular imprinting of a transition state analogue 189
Cu^{II}–diamine complex catalyzed hydrolysis of phosphate triesters adsorbed on strong-base ion exchange resins. ^{31}P NMR relaxation measurements 221
HZSM5
Acylation of phenol with acetic acid over a HZSM5 zeolite, reaction scheme 169
Immobilization
Lactose hydrolysis in milk by immobilized β-galactosidase 233
Immobilized enzymes
Human placental alkaline phosphatase covalently immobilized on a cross-flow microfiltration polyvinylidene difluoride membrane. Part I. Physicochemical effectors 85
Human placental alkaline phosphatase covalently immobilised on a cross-flow microfiltration polyvinylidene difluoride membrane Part II. Activity vs. [substrate] kinetic behaviour 105
Immobilization of lipase from *Candida cylindracea* on inorganic supports 357
Inorganic support
Immobilization of lipase from *Candida cylindracea* on inorganic supports 357
Ion exchange
Cu^{II}–diamine complex catalyzed hydrolysis of phosphate triesters adsorbed on strong-base ion exchange resins. ^{31}P NMR relaxation measurements 221
Iron
High resolution Auger electron spectroscopic study of the chemisorption and decomposition of benzene, cyclohexene and cyclohexane on a clean and carbided Fe(110) surface 181
Ketoesters
Enantioface-differentiating hydrogenation of the C=O double bond using a modified Raney nickel: role of the carboxylic acid added to the reaction system 211
Kinetics
Human placental alkaline phosphatase covalently immobilized on a cross-flow microfiltration polyvinylidene difluoride membrane. Part I. Physicochemical effectors 85
Human placental alkaline phosphatase covalently immobilised on a cross-flow microfiltration polyvinylidene difluoride membrane Part II. Activity vs. [substrate] kinetic behaviour 105
Global kinetics of the alkaline oxidative degradations of lactose 317
Methylamine synthesis over solid acid catalysts: reaction kinetic measurements 337
$KMnO_4$
Oxidation of catechol with $KMnO_4$ by using crown ethers as phase transfer catalysts 195
Lactose
Global kinetics of the alkaline oxidative degradations of lactose 317
Lactose hydrolysis
Lactose hydrolysis in milk by immobilized β-galactosidase 233
Ligand effect
Catalytic activity of anchored vanadyl complexes 29
Lipases
Kinetic behaviour and reaction mechanism of the hydrolysis of *p*-nitrophenyl palmitate in mixed micelles with Triton X-100 catalyzed by lipase from *Candida rugosa* 37
Immobilization of lipase from *Candida cylindracea* on inorganic supports 357
Lipidic esters
Kinetic behaviour and reaction mechanism of the hydrolysis of *p*-nitrophenyl palmitate in mixed micelles with Triton X-100 catalyzed by lipase from *Candida rugosa* 37
Magnesium
Role of surface chlorine species in the oxidative coupling of methane in the presence of tetrachloromethane on magnesium phosphate and sulphate 53
Mechanism
Human placental alkaline phosphatase covalently immobilised on a cross-flow microfiltration polyvinylidene difluoride membrane Part II. Activity vs. [substrate] kinetic behaviour 105
Menthol
Stereoselective reduction of menthone with sodium dithionite in the presence of β-cyclodextrin L247
Menthone
Stereoselective reduction of menthone with

sodium dithionite in the presence of β-cyclodextrin L247
Metal–oxygen bond
Transition metal oxides as catalysts for the selective reduction of nitrobenzene 305
Methane
Role of surface chlorine species in the oxidative coupling of methane in the presence of tetrachloromethane on magnesium phosphate and sulphate 53
Methane monooxygenase
Comparison of reactivity of alkene epoxidation with intact cells and cell-free extracts of *Methylosinus trichosporium* OB3b 119
Methylamine
Methylamine synthesis over solid acid catalysts: reaction kinetic measurements 337
Methylosinus trichosporium
Comparison of reactivity of alkene epoxidation with intact cells and cell-free extracts of *Methylosinus trichosporium* OB3b 119
Methylsulphone
Catalytic activity of anchored vanadyl complexes 29
Mixed micelles
Kinetic behaviour and reaction mechanism of the hydrolysis of *p*-nitrophenyl palmitate in mixed micelles with Triton X-100 catalyzed by lipase from *Candida rugosa* 37
Modified catalyst
Enantioface-differentiating hydrogenation of the C=O double bond using a modified Raney nickel: role of the carboxylic acid added to the reaction system 211
Modified catalysts
Physicochemical properties of TiO_2–SiO_2 unmodified and modified with H_2SO_4 and activity for acid catalysis 149
Molecular imprinting
Homogeneous esterolytic catalysis of a polymer prepared by molecular imprinting of a transition state analogue 189
Mononuclear complexes
Photocatalytic reduction of coordinated dinitrogen to ammonia – mononuclear versus dinuclear ethylenediaminetetraacetato ruthenium complexes 23
Neomenthol
Stereoselective reduction of menthone with sodium dithionite in the presence of β-cyclodextrin L247
Nickel
Subnanometer nickel clusters in complex reducing agents 79
Enantioface-differentiating hydrogenation of the C=O double bond using a modified Raney nickel: role of the carboxylic acid added to the reaction system 211
Nitrobenzene
Transition metal oxides as catalysts for the selective reduction of nitrobenzene 305
Nitrogen
Photocatalytic reduction of coordinated dinitrogen to ammonia – mononuclear versus dinuclear ethylenediaminetetraacetato ruthenium complexes 23
o-Phenylene-bis-salicylimine complexes
Catalytic activity of anchored vanadyl complexes 29
Organofluorine compounds
Recent contributions of carbonylation reaction to the synthesis of fluorinated pharmaceutical compounds 1
Oxidation
Oxidation of catechol with $KMnO_4$ by using crown ethers as phase transfer catalysts 195
Catalytic oxidation of erythrosine by cobalt phthalocyanines 253
Oxidative coupling
Role of surface chlorine species in the oxidative coupling of methane in the presence of tetrachloromethane on magnesium phosphate and sulphate 53
Oxidative degeneration
Global kinetics of the alkaline oxidative degradations of lactose 317
Oxygen
Catalytic oxidation of erythrosine by cobalt phthalocyanines 253
Oxygenases
Comparison of reactivity of alkene epoxidation with intact cells and cell-free extracts of *Methylosinus trichosporium* OB3b 119
Pharmaceuticals
Recent contributions of carbonylation reaction to the synthesis of fluorinated pharmaceutical compounds 1
Phase transfer
Oxidation of catechol with $KMnO_4$ by using crown ethers as phase transfer catalysts 195
Phenylacetylene
Polymerization of phenylacetylene by Lewis acid activated tungsten carbonyl complexes 137
Phenylsulphone
Catalytic activity of anchored vanadyl complexes 29
Phosphate
Role of surface chlorine species in the oxidative coupling of methane in the presence of tetrachloromethane on magnesium phosphate and sulphate 53

Phosphate triesters
Cu^{II}–diamine complex catalyzed hydrolysis of phosphate triesters adsorbed on strong-base ion exchange resins. ^{31}P NMR relaxation measurements 221
Photocatalysis
Photocatalytic reduction of coordinated dinitrogen to ammonia – mononuclear versus dinuclear ethylenediaminetetraacetato ruthenium complexes 23
Photoreactivation
Dark catalytic reduction of CO_2 over Prussian blue-deposited TiO_2 and the photo-reactivation of the catalyst 269
Phthalocyanine
Catalytic oxidation of erythrosine by cobalt phthalocyanines 253
Physicochemical properties
Physicochemical properties of TiO_2–SiO_2 unmodified and modified with H_2SO_4 and activity for acid catalysis 149
Placental alkaline phosphatase
Human placental alkaline phosphatase covalently immobilized on a cross-flow microfiltration polyvinylidene difluoride membrane. Part I. Physicochemical effectors 85
Human placental alkaline phosphatase covalently immobilised on a cross-flow microfiltration polyvinylidene difluoride membrane Part II. Activity vs. [substrate] kinetic behaviour 105
Platinum
High temperature treated Pt/Sn–$ZnAl_2O_4$ catalysts 67
p-Nitrophenyl esters
Kinetic behaviour and reaction mechanism of the hydrolysis of *p*-nitrophenyl palmitate in mixed micelles with Triton X-100 catalyzed by lipase from *Candida rugosa* 37
Polymer catalyst
Homogeneous esterolytic catalysis of a polymer prepared by molecular imprinting of a transition state analogue 189
Polymerization
Polymerization of phenylacetylene by Lewis acid activated tungsten carbonyl complexes 137
Polyvinylidene difluoride
Human placental alkaline phosphatase covalently immobilized on a cross-flow microfiltration polyvinylidene difluoride membrane. Part I. Physicochemical effectors 85
Human placental alkaline phosphatase covalently immobilised on a cross-flow microfiltration polyvinylidene difluoride membrane Part II. Activity vs. [substrate] kinetic behaviour 105
Prussian blue
Dark catalytic reduction of CO_2 over Prussian blue-deposited TiO_2 and the photo-reactivation of the catalyst 269
Pyridine complexes
Hydroformylation of 1-aryl-1-(2-pyridyl)ethenes catalyzed by rhodium complexes 279
Pyridylethenes
Hydroformylation of 1-aryl-1-(2-pyridyl)ethenes catalyzed by rhodium complexes 279
Reaction rate
Catalytic oxidation of erythrosine by cobalt phthalocyanines 253
Reduction
Photocatalytic reduction of coordinated dinitrogen to ammonia – mononuclear versus dinuclear ethylenediaminetetraacetato ruthenium complexes 23
Subnanometer nickel clusters in complex reducing agents 79
Stereoselective reduction of menthone with sodium dithionite in the presence of β-cyclodextrin L247
Dark catalytic reduction of CO_2 over Prussian blue-deposited TiO_2 and the photo-reactivation of the catalyst 269
Infrared observation of the chemical consequences of cobalt catalyst produced in mixed solutions of $Al(Et)_3$ and $Co(acac)_2$ 289
Relaxation measurements
Cu^{II}–diamine complex catalyzed hydrolysis of phosphate triesters adsorbed on strong-base ion exchange resins. ^{31}P NMR relaxation measurements 221
Resins
Cu^{II}–diamine complex catalyzed hydrolysis of phosphate triesters adsorbed on strong-base ion exchange resins. ^{31}P NMR relaxation measurements 221
Rhodium
Hydroformylation of 1-aryl-1-(2-pyridyl)ethenes catalyzed by rhodium complexes 279
Ruthenium
Photocatalytic reduction of coordinated dinitrogen to ammonia – mononuclear versus dinuclear ethylenediaminetetraacetato ruthenium complexes 23
Salicylaldoxime complexes
Catalytic activity of anchored vanadyl complexes 29
Selective reduction
Transition metal oxides as catalysts for the selective reduction of nitrobenzene 305
Silica
Physicochemical properties of TiO_2–SiO_2

unmodified and modified with H_2SO_4 and activity for acid catalysis 149
Methylamine synthesis over solid acid catalysts: reaction kinetic measurements 337
Sodium methoxide
Homogeneous catalytic synthesis of formaldehyde using the tungsten carbonyl complex $[(CO)_5WCl]^-$ in the presence of sodium methoxide 125
Solid acid
Methylamine synthesis over solid acid catalysts: reaction kinetic measurements 337
Stereoselectivity
Stereoselective reduction of menthone with sodium dithionite in the presence of β-cyclodextrin L247
Sulphate
Role of surface chlorine species in the oxidative coupling of methane in the presence of tetrachloromethane on magnesium phosphate and sulphate 53
Sulphuric acid
Physicochemical properties of TiO_2–SiO_2 unmodified and modified with H_2SO_4 and activity for acid catalysis 149
tert-Butylhydroperoxide
Catalytic activity of anchored vanadyl complexes 29
Tetrachloromethane
Role of surface chlorine species in the oxidative coupling of methane in the presence of tetrachloromethane on magnesium phosphate and sulphate 53
Thenoyl-1,1,1-trifluoroacetone complexes
Catalytic activity of anchored vanadyl complexes 29
Tin
High temperature treated $Pt/Sn–ZnAl_2O_4$ catalysts 67
Titania
Physicochemical properties of TiO_2–SiO_2 unmodified and modified with H_2SO_4 and activity for acid catalysis 149
Dark catalytic reduction of CO_2 over Prussian blue-deposited TiO_2 and the photo-reactivation of the catalyst 269
Transition metal oxides
Transition metal oxides as catalysts for the selective reduction of nitrobenzene 305
Transition state analogue
Homogeneous esterolytic catalysis of a polymer prepared by molecular imprinting of a transition state analogue 189
Triethylaluminium
Infrared observation of the chemical consequences of cobalt catalyst produced in mixed solutions of $Al(Et)_3$ and $Co(acac)_2$ 289
Tungsten
Homogeneous catalytic synthesis of formaldehyde using the tungsten carbonyl complex $[(CO)_5WCl]^-$ in the presence of sodium methoxide 125
Polymerization of phenylacetylene by Lewis acid activated tungsten carbonyl complexes 137
Vanadium
Catalytic activity of anchored vanadyl complexes 29
Zeolite
Acylation of phenol with acetic acid over a HZSM5 zeolite, reaction scheme 169
Zeolites
Methylamine synthesis over solid acid catalysts: reaction kinetic measurements 337
Zinc
High temperature treated $Pt/Sn–ZnAl_2O_4$ catalysts 67
